# Presentation

A website is the best way to communicate with the world.
The AccessCodeSchool training allows me to acquire the necessary skills that will allow me to improve the communication of my future clients.

The goal of my Portfolio is to share my knowledge and what I have learned in recent months.

This project consists of 2 parts:

1) The client-side

This part will be visible to the public.
It will allow people who visit the site to learn more about me and know my background.
They can also get an idea of the projects I have already done via a Portfolio.
A "Contact" section will also allow them to contact me.
Of course it will also be possible to find all my access to social networks to follow my news.

2) The back-office

Only accessible by the administrator, this part will allow me to easily manage the news of the site by connecting me with a login and a password.

The supporting documents for this project will be a functional specification and a technical description (MVC) of the website.

Enjoy...

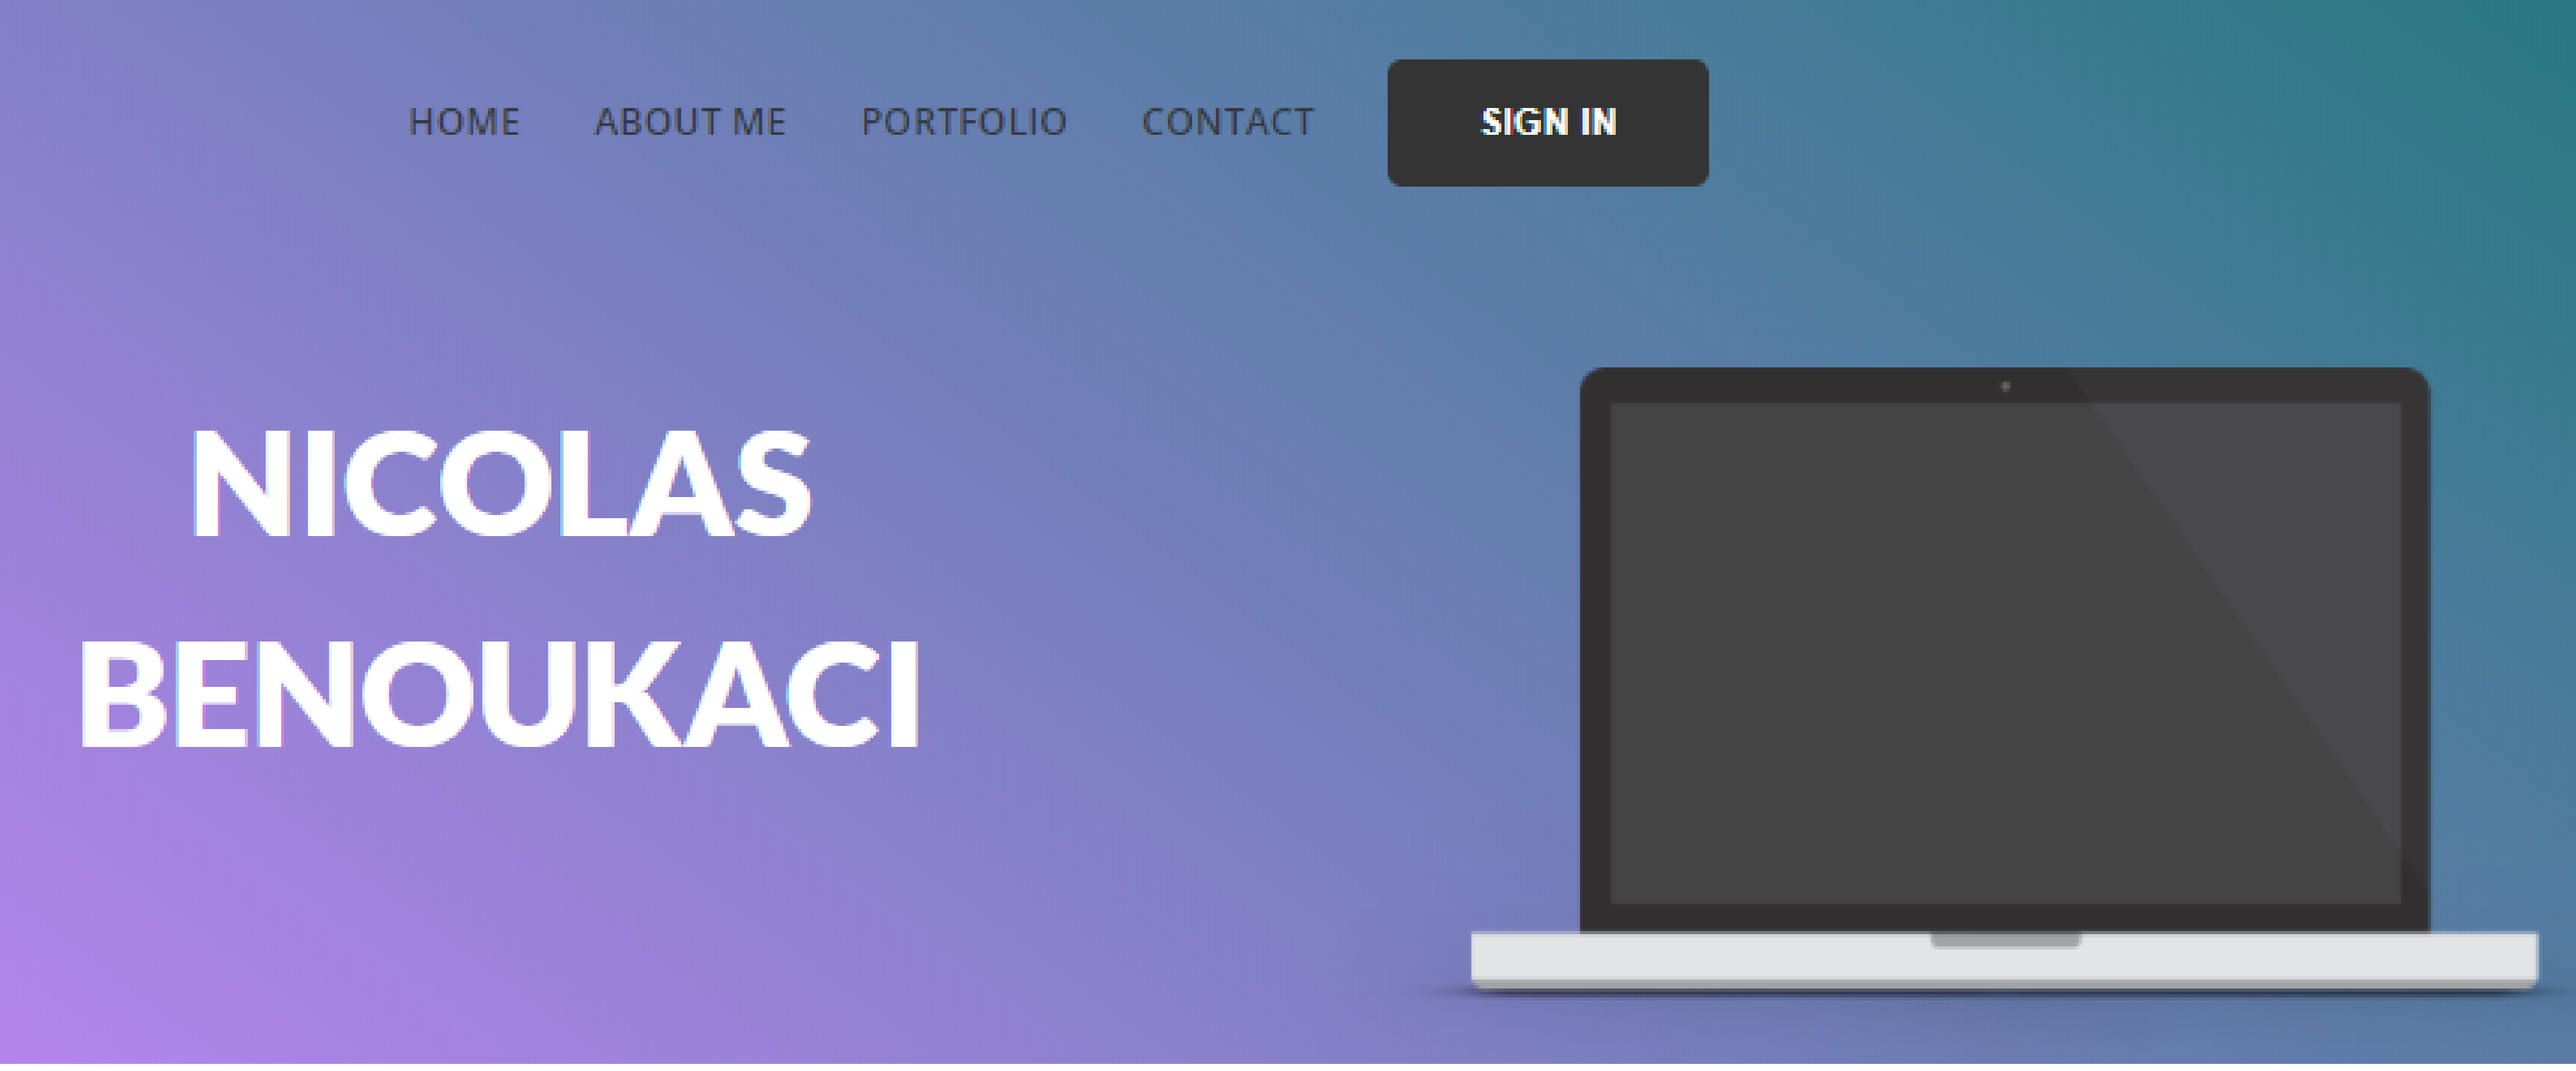
# Client-side



# HOME PAGE

It's the home section of the Website.
She is composed :
- Website's Title
- One fixed menu containing the different sections.
- A SignIn button to connect to the back office

*La HomePage est la section d'accueil du site.*
*Elle se compose :*
*- Du titre du site*
*- D'un menu fixe contenant les différentes rubriques.*
*- D'un bouton SignIn permettant de se connecter au back-office*

# ABOUT ME

The AboutMe section will contain a short presentation of my goals, the possibility to download my resume and the technologies used.

*La section AboutMe contiendra une brève présentation de mes objectifs, la possibilité de télécharger mon CV ainsi que les technologies utilisées.*

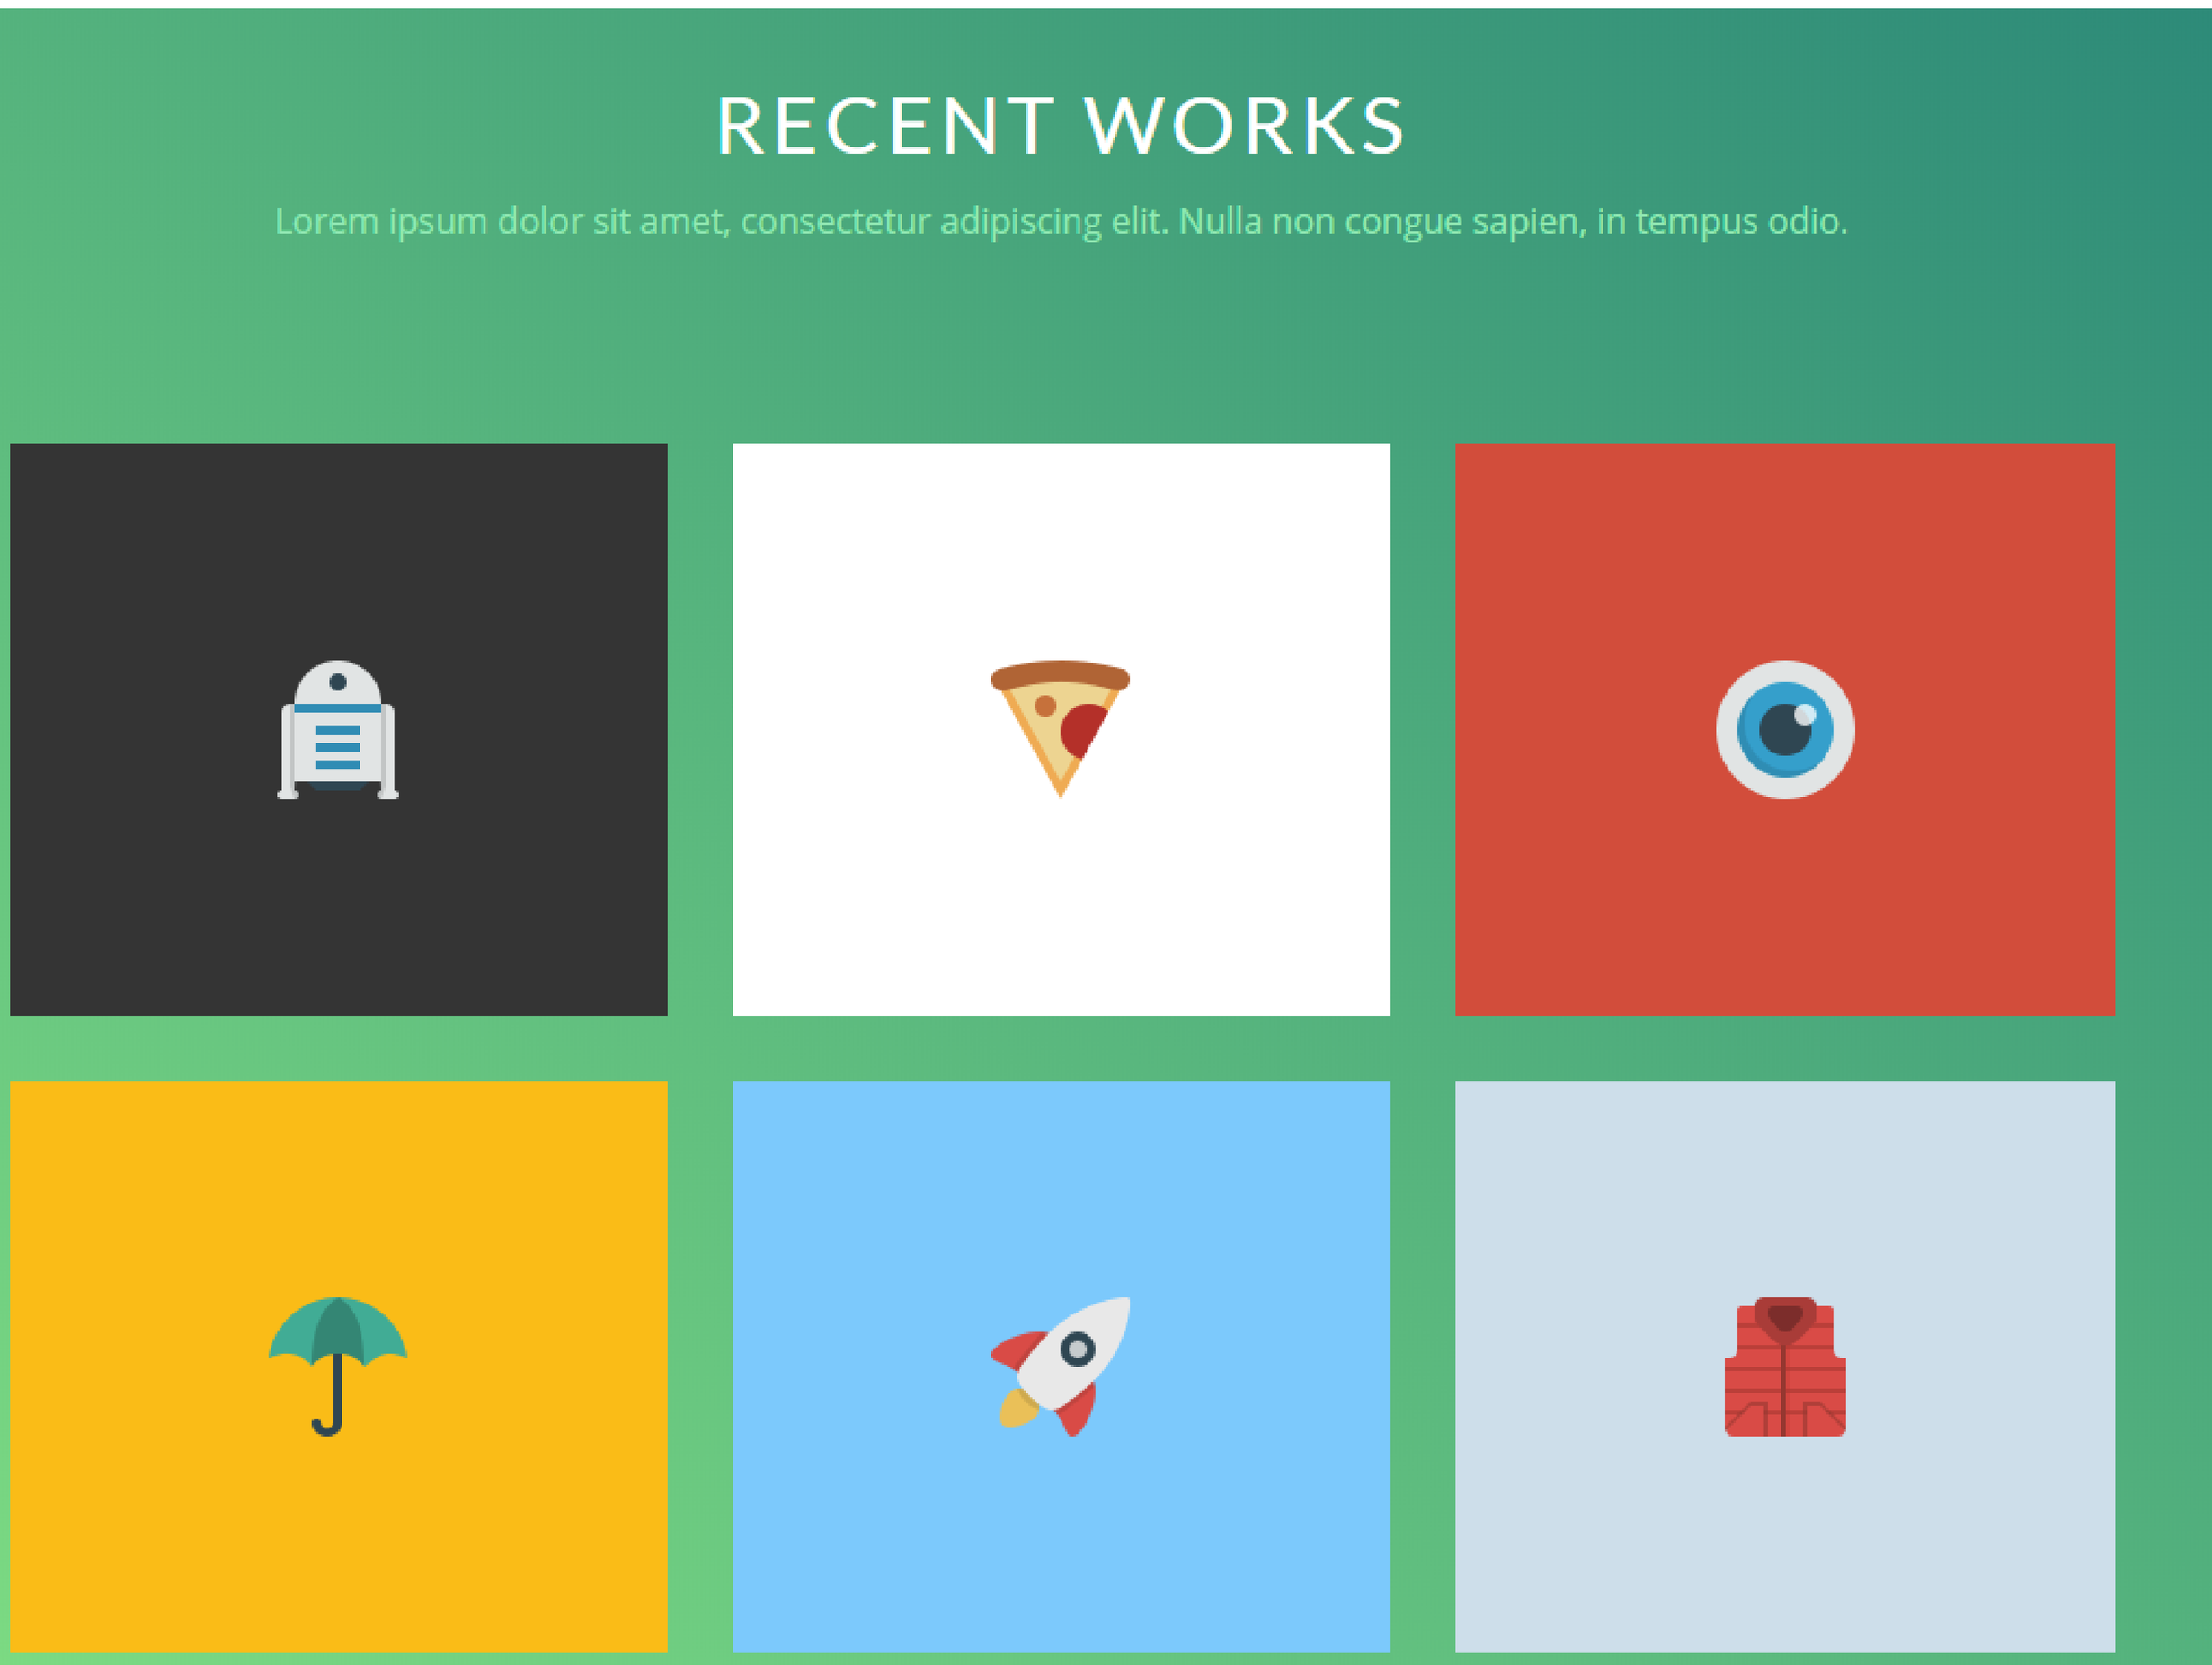
PHP/MYSQL

# PORTFOLIO

The Portfolio will consist of a dynamic gallery showing the most recent projects.
It will be possible to enlarge the thumbnail by clicking on it.
The possibility of launching the project in a new tab is possible.

*Le Portfolio sera composé d'une galerie dynamique reprenant les projets les plus récement réalisés.*
*Il sera possible d'agrandir la miniature en cliquant dessus.*
*La possibilité de lancer le projet dans un nouvel onglet est envisageable.*



# CONTACT

The contact form offers the possibility to contact me.
The received mails will be stored in the database which will be presented to you later.

*Le formulaire de contact offre la possibilité de me contacter.*
*Les mails reçus seront stockés dans la base de données qui vous sera présentée plus loin.*

ADMIN PANEL

To access the BackOffice you will need to login with a login and a password.
Once identified, it will be possible to access the admin.

It is planned to disconnect by clicking on a button.

*Pour accéder au BackOffice il faudra s'identifier avec un login et un mot de passe.*
*Une fois identifié, il sera possible d'accéder à l'admin.*
Il est prévu de se déconnecter en cliquant sur un bouton prévu à cet effet.

The Admin will display the received mails and delete them.

*L'Admin permettra de visualiser les mails reçus et de les supprimer.*

It will also be possible to display the list of projects.
Several actions will be available such as editing, adding, deleting and viewing.

*Il sera également possible d'afficher la liste des projets.*
*Plusieurs actions seront disponibles comme la modification, l'ajout, la suppression et la visualisation.*
